

TRANSPARENT AND ACCOUNTABLE REPORTING

VS.

TRANSPARENT AND ACCOUNTABLE REPORTING

Deliver transparent, accountable and evidence-based decision-making

The City intends to report annually on progress in achieving some of its Official Plan goals.

Which topics will be tracked? What metrics (targets and indicators) will be monitored for each topic? We don't yet know, and need to before the plan is approved. A concise, easily accessible, easy to understand, robust reporting framework is key to knowing whether the plan is performing as intended.

1. We want the Official Plan to commit to engaging with stakeholders to help set targets and determine how to measure progress.

2. We want the City to assign a senior manager responsible for producing a single, integrated, annual "Vital Signs" Dashboard for selected topics, based on specific targets and indicators.

The [People's Official Plan Technical Report](#) (pp. 5-10) provides a description of twelve topics we believe should be tracked with targets and indicators.

12 Topics That Should Be Tracked:	
RECONCILIATION/MEANINGFUL CONSULTATION	COMMUNITY/NEIGHBOURHOOD ECONOMIC DEVELOPMENT
COMMUNITY ENGAGEMENT	TREES & GREENSPACES
INTENSIFICATION	MOBILITY
AFFORDABLE HOUSING	FOOD AND AGRICULTURE
EQUITY OF SOCIAL OUTCOMES	FINANCIAL SUSTAINABILITY
CLIMATE (GHG MITIGATION)	CLIMATE (RESILIENCE/ADAPTATION)

METRIC SELECTION CRITERIA
MEANINGFUL TARGETS. TIMELY. ACCURATE
REFLECT VALUES OF SOCIAL EQUITY AND QUALITY OF LIFE
USEFUL FOR DECISION-MAKING & FUNDING ALLOCATIONS
CALCULABLE CONSISTENTLY OVER TIME
ABLE TO SHOW HOW MUCH PROGRESS IS BEING MADE
